HWTA Water Energisers

Tastes better. Better for you.

Installation Instructions

IMPORTANT: Read all instructions before commencing installation.

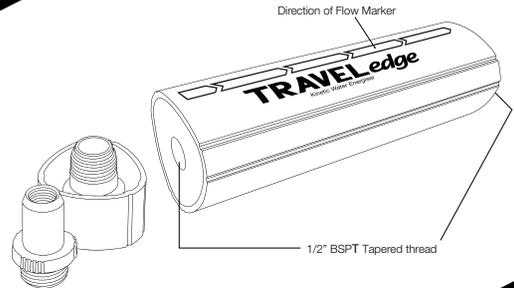

The Travel Edge Water Energiser is designed to be a handheld unit or installed to the main inlet cold water supply to the home. Do not install on to any hot water line.

Should above ground installation be required, the device must be completely enclosed in a suitable enclosure to shield it from direct and indirect sunlight.

The device can be installed in either a vertical or horizontal orientation.

In regions where the supply pressure exceeds 750kPa, a pressure reducing device **MUST** be installed at the inlet side of the device.
